ing water from the Forbestown Ditch.

Your Mother is laid up at Media with a very severe attack of Grippe, with bronchial attachment, exactly similar to my attack two years ago in San Francisco. Dr. Pratt says that she will not be able to leave the house under ten days or two weeks. I shall be here in any event until the 8th of January and shall, I presume, meantime, receive definite information of your movements. Edith is not as well as usual and will be detained at Absecon until your Mother can return there; otherwise all members of the family are as well as usual.

Ever your affectionate Father,

W. J. Supply

P.S. I am partly influenced, in sending this, by the idea you had in mind some time ago, of keeping in contact with Myers, for future purposes. We don't see it in any clear conception of the situation at present just now.
